PROFESSIONAL PROFILE

Professional focused on Data Engineering and Analytics with hands-on experience in data integration, ETL process automation, and analytical solutions on Google Cloud Platform (GCP). Experienced in working with BigQuery, Cloud Functions, Cloud Scheduler, Dataflow, and Looker Studio on projects related to data migration, cloud automation, analytical modeling, and reporting. Involved in Data Warehouse, Data Lake, data quality processes, and training of analytical models. Ability to collaborate with multidisciplinary teams in analytics, development, and QA in the implementation of business-oriented solutions.

PROFESSIONAL EXPERIENCE

Data Analyst - Data Rookie

Davinci Technologies | Sep 2023 - Jul 2024

- Participated in Oracle to BigQuery migration processes through ETL pipelines on GCP.
- Configured batch processes and data integrations using BigQuery, Dataflow, and Cloud Scheduler.
- Implemented cloud automations with Cloud Functions and Cloud Run integrated with Firebase/Firestore and BigQuery.
- Collaborated on Data Warehouse, Data Lake, data catalog, and access control initiatives on GCP.
- Developed analytical dashboards in Looker Studio connected to BigQuery and other data sources.
- Contributed to data cleaning, transformation, and analysis for analytical models and machine learning processes.
- Produced technical documentation, functional evidence, and process validation in collaboration with development, QA, and analytics teams.

Development Intern

JHWEB S.A.S | Jan 2023 - May 2023

- Supported the development and maintenance of web applications using Joomla and CMS.
- Managed relational databases in MySQL, ensuring integrity and support for internal projects.
- Implemented application prototypes in Flutter Flow and video games in Construct 3, applying agile collaboration methodologies.
- Participated in projects for functional improvement, technical support, and documentation of digital processes.

PROJECTS

TFM Análisis del riesgo de ciberataques en vehículos conectados (Final Master Project)

- Designed an end-to-end data pipeline to detect cyberattacks (DoS, spoofing, fuzzing) using CAN bus data.
- Processed over 17M records using PySpark for distributed data analysis.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to identify anomalous patterns in CAN bus signals.
- Developed supervised and unsupervised models (Random Forest, XGBoost, Autoencoders) for anomaly detection.
- Applied feature engineering and class imbalance techniques to improve model performance.

Sistema de apoyo a la toma de decisiones para el retorno a la presencialidad durante la pandemia del covid-19 (Undergraduate Thesis)

- Developed a decision-support application to evaluate safe return-to-campus scenarios based on health and capacity variables.
- Modeled decision criteria including symptoms, social distancing, and classroom occupancy constraints.
- Designed logical rules to support risk assessment and operational decision-making.
- Built a functional prototype using FlutterFlow to simulate real-world usage.

EDUCATION

Master in Data Science

CEUPE - Spain | Sept 2024 - Sept 2025

- Final Project: TFM Análisis del riesgo de ciberataques en vehículos conectados.

Systems Engineering

Universidad Mariana - Colombia | Jan 2019 - Nov 2023

- Graduated with Honors for Outstanding Final Project: Sistema de apoyo a la toma de decisiones para el retorno a la presencialidad durante la pandemia del covid-19.

TECHNICAL SKILLS

Languages: SQL, Python.

Cloud & Data Engineering: Google Cloud Platform (GCP), BigQuery, Cloud Functions, Cloud Run, Cloud Scheduler, Dataflow, Cloud Storage, Firebase / Firestore.

Data & Analytics: ETL / ELT, Data Pipelines, Data Warehouse, Data Lake, Data Modeling, Data Quality, Exploratory Data Analysis (EDA).

BI & Visualization: Looker Studio, Power BI, Excel, Google Sheets.

Machine Learning: Scikit-learn, PySpark MLlib, XGBoost, Model Evaluation, Anomaly Detection.

Herramientas: Git, Jupyter Notebook, Dialogflow.

ACADEMIC ACHIEVEMENTS & ACTIVITIES

- Responsible Prompting: Maximizing AI in Business – Microsoft & Founderz.
- Google Cloud Big Data and Machine Learning Fundamentals.
- Building Batch Data Pipelines on Google Cloud.
- Modernizing Data Lakes and Data Warehouses with Google Cloud.
- Smart Analytics, Machine Learning, and AI on Google Cloud.
